

CHAPTER SIX – RECOMMENDED ALTERNATIVE

Since discreet packages of regional alternatives were not evaluated, a formal set of recommendations is not presented. Project-specific recommendations are presented in Chapter 8 and reflect the analysis of the CMPO Technical Steering Committee and Executive Council. Recommendations include both the individual projects which are promoted for construction as well as the package of projects included in each phase.

- Phase 1 construction accounts for the years 2007 until 2015 and includes projects presently programmed (i.e. funding committed for construction) as well as those projects selected in this first phase of construction.
- Phase 2 projects include those projects planned for the years 2016 until the year 2025.
- Phase 3 projects include those projects planned for the years 2026 until 2030.

It is worth emphasizing that the CMPO plans on updating this transportation plan every four years to reflect changing conditions and as dictated by federal metropolitan planning regulations. Future projects and phases can be evaluated during these updates.
